

Dr. Hüseyin Aygün

In 1997 Dr. Hüseyin Aygün co-founded BioSpring GmbH, an oligonucleotide manufacturing company, taking on the role of Chief Scientific Officer. As CSO he develops and establishes new synthesis and purification strategies for oligonucleotides. Since 2006 he has also been responsible for the GMP production of therapeutic oligonucleotides at BioSpring. Dr. Aygün obtained his diploma in Chemistry in 1994 and a PhD in Chemistry in the field of Biotechnology from the University of Frankfurt in 2000. Since 2001 he has been co-developing "smart" protection strategies for in vivo applications of RNA drugs. He is co-inventor of several patents in the field of nucleic technologies as well as co-author of several publications.

In 2010 he co-founded AduTide Pharmaceuticals GmbH.
