## (1) Institution

### **AESKU.KIPP INSTITUTE: RESPONSIBILITY FOR PATIENTS AND SOCIETY**

The AESKU.KIPP INSTITUTE located in Wendelsheim, Germany, creates a new base for continuing, interdisciplinary and international research and further training in the field of autoimmunity.

The institute is distinguished by the extraordinary synthesis of networked scientific competence and clear orientation to practical issues; it provides ideal conditions for the timely implementation of current research into new diagnostic and therapeutic options.

An active information policy will present current possibilities of prognosis, diagnostics and therapy to the public, for the benefit of patients and treating physicians. Thus, yearlong odysseys of affected individuals will hopefully soon be a thing of the past.

## (2) Core Competencies

The AESKU.KIPP INSTITUTE initiates and coordinates international research cooperation and development joint interdisciplinary projects at the Wendelsheim facility.

A future-oriented event forum is being created at the AESKU.KIPP INSTITUTE, including meetings between leading scientists, contribution to PhD degree programs further training of doctors and laboratories as well s information events for patients.

The AESKU.KIPP INSTITUTE has consciously positioned itself as an international interface between basic and clinical research, so that recent research results may be integrated into clinical applications.

## (3) Cooperations offered and requested

Due to its focus on autoimmunity research, the AESKU.KIPP INSTITUTE offers ultimate expert competence and far-reaching networking. Its neutrality makes the AESKU.KIPP INSTITUTE a suitable partner for international scientific cooperation, therefore establishing the base of international multicenter studies.

In addition to its coordination work to support interdisciplinary research cooperation, the AESKU.KIPP INSTITUTE also offers space and human resources for actual on-site cooperation at the Wendelsheim office.

Moreover the AESKU.KIPP INSTITUTE grants interdisciplinary research projects and research stays at the Wendelsheim facility.
