

Bernhard Brüne, PhD, Professor of Biochemistry
born on November 5, 1957 in Homberg/Efze, Germany

Education

- 1996 Postdoctoral Fellow (3 month leave), Department of Cellular & Molecular Neurosciences, Harvard Medical School, Boston, MA, USA
- 1991 - 1994 Research Associate, Department of Biological Chemistry, University of Konstanz, Germany
- 1989 - 1990 Postdoctoral Fellow, Department of Toxicology and Environmental Medicine, Karolinska Institute, Stockholm, Sweden
- 1988 - 1989 Postdoctoral Fellow, Division of Cell Biology, Glaxo-Wellcome, Research Triangle Park, NC, USA
- 1985 - 1988 PhD Fellow, Department of Biological Chemistry, Faculty of Biology, University of Konstanz, Germany
- 1979 - 1984 Studies of Biochemistry at the Eberhard-Karls-University of Tübingen, Germany

Professional Positions

- since 2009 Speaker of the Collaborative Research project SFB815 'Redox-Regulation' Generating systems and functional consequences
- since 2004 Professor of Biochemistry I (Head of Department), Goethe-University, Faculty of Medicine, Frankfurt am Main, Germany
- 2001 - 2004 Professor of Cell Biology (Head of Department), Faculty of Biology, University of Kaiserslautern, Germany
- 1999 - 2001 Deputy Head, Collaborative Research Center (Sonderforschungsbereich) SFB 423 "Damage of the Kidney: Pathology and Mechanism of Regeneration"
- 1996 - 1999 Head, Clinical Research Group "Molecular Regulatory Mechanisms in glomerular Cells of the Kidney", University of Erlangen-Nürnberg, Germany
- 1996 - 2001 Professor of Experimental Medicine, Section Head of Basic Research, Department of Medicine, University of Erlangen-Nürnberg School of Medicine, Germany
- 1994 - 1996 Associate Professor of Biochemistry, Department of Biological Chemistry, University of Konstanz, Germany
