

1. Company

Carbolution Chemicals GmbH
Saarland University, Starterzentrum
Im Stadtwald, Building A1.2
66123 Saarbrücken

Founded in october 2010
Founder and only employee: Dr. Michael Bauer

2. Core Competences

Carbolution Chemicals GmbH is an EU-wide distributor of innovative research chemicals. The offering is characterized by low prizes, short delivery times and the abandonment of minimum order quantities. This exactly fits to the demands of universities and research organizations.

These are not only the main target group, but also the developers of new products. However, the market potentials of these new developments most often remains untapped. That is why Carbolution Chemicals GmbH is also offering distribution cooperations to universities and research organizations.

By these two fields of action, Carbolution Chemicals GmbH appears right at the interface between science and economy – and makes it accessible from both sides.

3. Cooperations offered and requested

Offering distribution cooperations for research chemicals

Requesting suppliers for research chemicals
