2. Core competences

Eurice offers comprehensive support for the planning and implementation of EU-funded R&D projects by making a central project office available that has at its disposal all the appropriate resources, tools and expertise in research and project management. An experienced team of experts provides support and consultancy for scientists and researchers at universities, in businesses and research institutes from the first project idea to the successful completion.

Within FP6/FP7, a particular focus of our activities lies in the field of Life Sciences. So far, we have been involved in the preparation and/or management of 13 EU-cooperation projects with a budget of over 85 million Euro.

In addition, we work as a training partner for the EU preparing scientists and business leaders to master the challenges that researchers face when working in international EU-funded projects.
