Company / Product Logo:

2 Core Competence

As a specialist for process automation and Information Technology and with an orientation towards Production Intelligence solutions (PI), the FELTEN Group has been optimizing communication on all business levels since 1990 in **Pharmaceutical, Food & Beverage, Flavors & Fragrance** and **Cosmetic** industry.

Our competence is particularly appreciated where integral concepts are required, where existing systems from different manufacturers have to be integrated into one solution and where comprehensive know how and process knowledge are needed.

FELTEN Group is your competent partner for:

- Production Intelligence (PI) strategies
- for modern information management e.g. TPM(Total Productive Management)-Software including Machine & Production Data Acquisition and Analyses
- MES (Manufacturing Execution Systems)
- innovative production management
- Software development and customizing, according to the guidelines of the FDA/EMEA, GAMP, ER/ES (21 CFR Part 11), EU GMP
- project management
- consulting & validation service

3 Cooperation's offered and requested

PI - Institute

In the manufacturing industry, a strategic objective is developing itself with Production Intelligence (PI), behind which demanding standards with regard to the process quality and cost-effectiveness are concealed. Production Intelligence is to be suited as a Value Added Strategy that take advantage of the full potential of efficiency within the production management.
