

PharmaForum - 3. November 2010 in Mainz

1. Company

- Marenis Analytical and Process Technologies GmbH, Alt Fechenheim 34, 60388 Frankfurt
- Founded in 2010
- Currently 5 Persons , all experienced in drug delivery/analytical characterisation (NCE development)
- Contact Person: Dr. Matthias Rischer, Managing Director, Phone: +49(0)6940809966, mobil: +49(0)1726256582

2. Core Competences

Drug Delivery Unit for external cooperations with:

- API characterisation
- Preformulation screening (HME, SMEDDS, amorphous systems, complexes, nanoparticles) with innovative technologies
- Special analytical characterisation (PSD, Zeta- and flow potential, surface)
- Dissolution in biorelevant media and pk/pD modelling für preformulations and development of dissolution media for colon (sustained release)
- Development of new technology platforms (e.g. nanodispersions in polymers)

3. Cooperations offered and requested

Type of cooperation offered:

- co-development
- fee for service (also basic research project)
- cooperation to generate IP for new technology /dissolution platform

Time lines:

- start in December possible
