

PharmaForum 2008, 11. November, Saarbrücken

(1) Institution + (2) Core Competencies

APPLIED LIFE SCIENCE CLUSTER IMMUNOLOGY / AUTOIMMUNITY

Partnerships and networks involving all partners along the entire value chain in R&D - academia, biotech SMUs and pharma/medical device firms are essential to streamline R&D processes and to shorten the "time to market" of new diagnostic or therapeutic products.

The Applied Life Science Cluster Immunity, located in Wendelsheim, Germany, creates a new base for continuing, interdisciplinary and international R&D in the field of immunity especially in autoimmunity.

The network is distinguished by the extraordinary synthesis of networked scientific competence and clear orientation to practical issues; it provides ideal conditions for the timely implementation of current research into new diagnostic and therapeutic options.
