Prof. Dr. Rolf W. Hartmann (Founder & Scientific Advisor)

ElexoPharm is a company providing services for medicinal chemistry research for the pharmaceutical industry. We are focused on the discovery and optimisation of new drugs. As a spin-off of Saarland University **ElexoPharm** can benefit from more than 20 years of experience in design, synthesis and biological evaluation of pharmaceutically active substances. Furthermore **ElexoPharm** runs an own drug development program resulting in licence offers.

2. Core Competences

ElexoPharm offers consulting and contract research services in the field of medicinal chemistry like target validation, hit finding, from hit to lead and lead optimisation including synthetic realisation.

ElexoPharm have two licensing offers in the field of cardiovascular and estrogen dependent diseases.

3. Cooperations offered and requested

ElexoPharm is looking for pharma and biotech companies interested in CRO services and for cooperation partners concerning the licensing offers.
