

Core Competences

The Patent Marketing Agency (PVA) of Saarland University was founded in 2002. It is responsible for consultancy and support of the scientists of Saarland University as far as technology transfer and especially inventions are concerned.

The services of PVA include patent research, evaluation of the patentability and marketability of inventions, elaboration of patent strategies, protection of intellectual and industrial property in collaboration with patent attorneys, elaboration and implementation of patent marketing strategies. The process of patent marketing includes market evaluation and segmentation as well as approaching potential licencees, the elaboration and implementation of agreements concerning licences and sales and the support of start-up companies.

Cooperations offered and requested

We provide different inventions in the field of pharmaceuticals and biotechnology. We are interested in selling the IP rights of our inventions as well as in licensing. Purchasing exclusive as well as simple licenses for different application is possible.
