The solution: kidiDNA

kidiDNA is a medical application based on a high-precise ML system. It reduces malnutrition, increases medication adherence, supports blood pressure management and enables monitoring of the disease by the patient and the doctor.

The solution: kidiDNA

CE certified medical device

- Safety protection
- Health protection
- Functionality

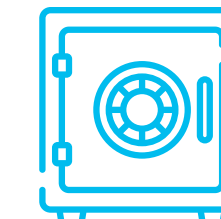

Certification for medical products

- EN IEC 62304: Software lifecycle
- EN ISO 13485 2016: Quality management
- EN ISO 14971: Risk-Management
- EN IEC 62366: Usability

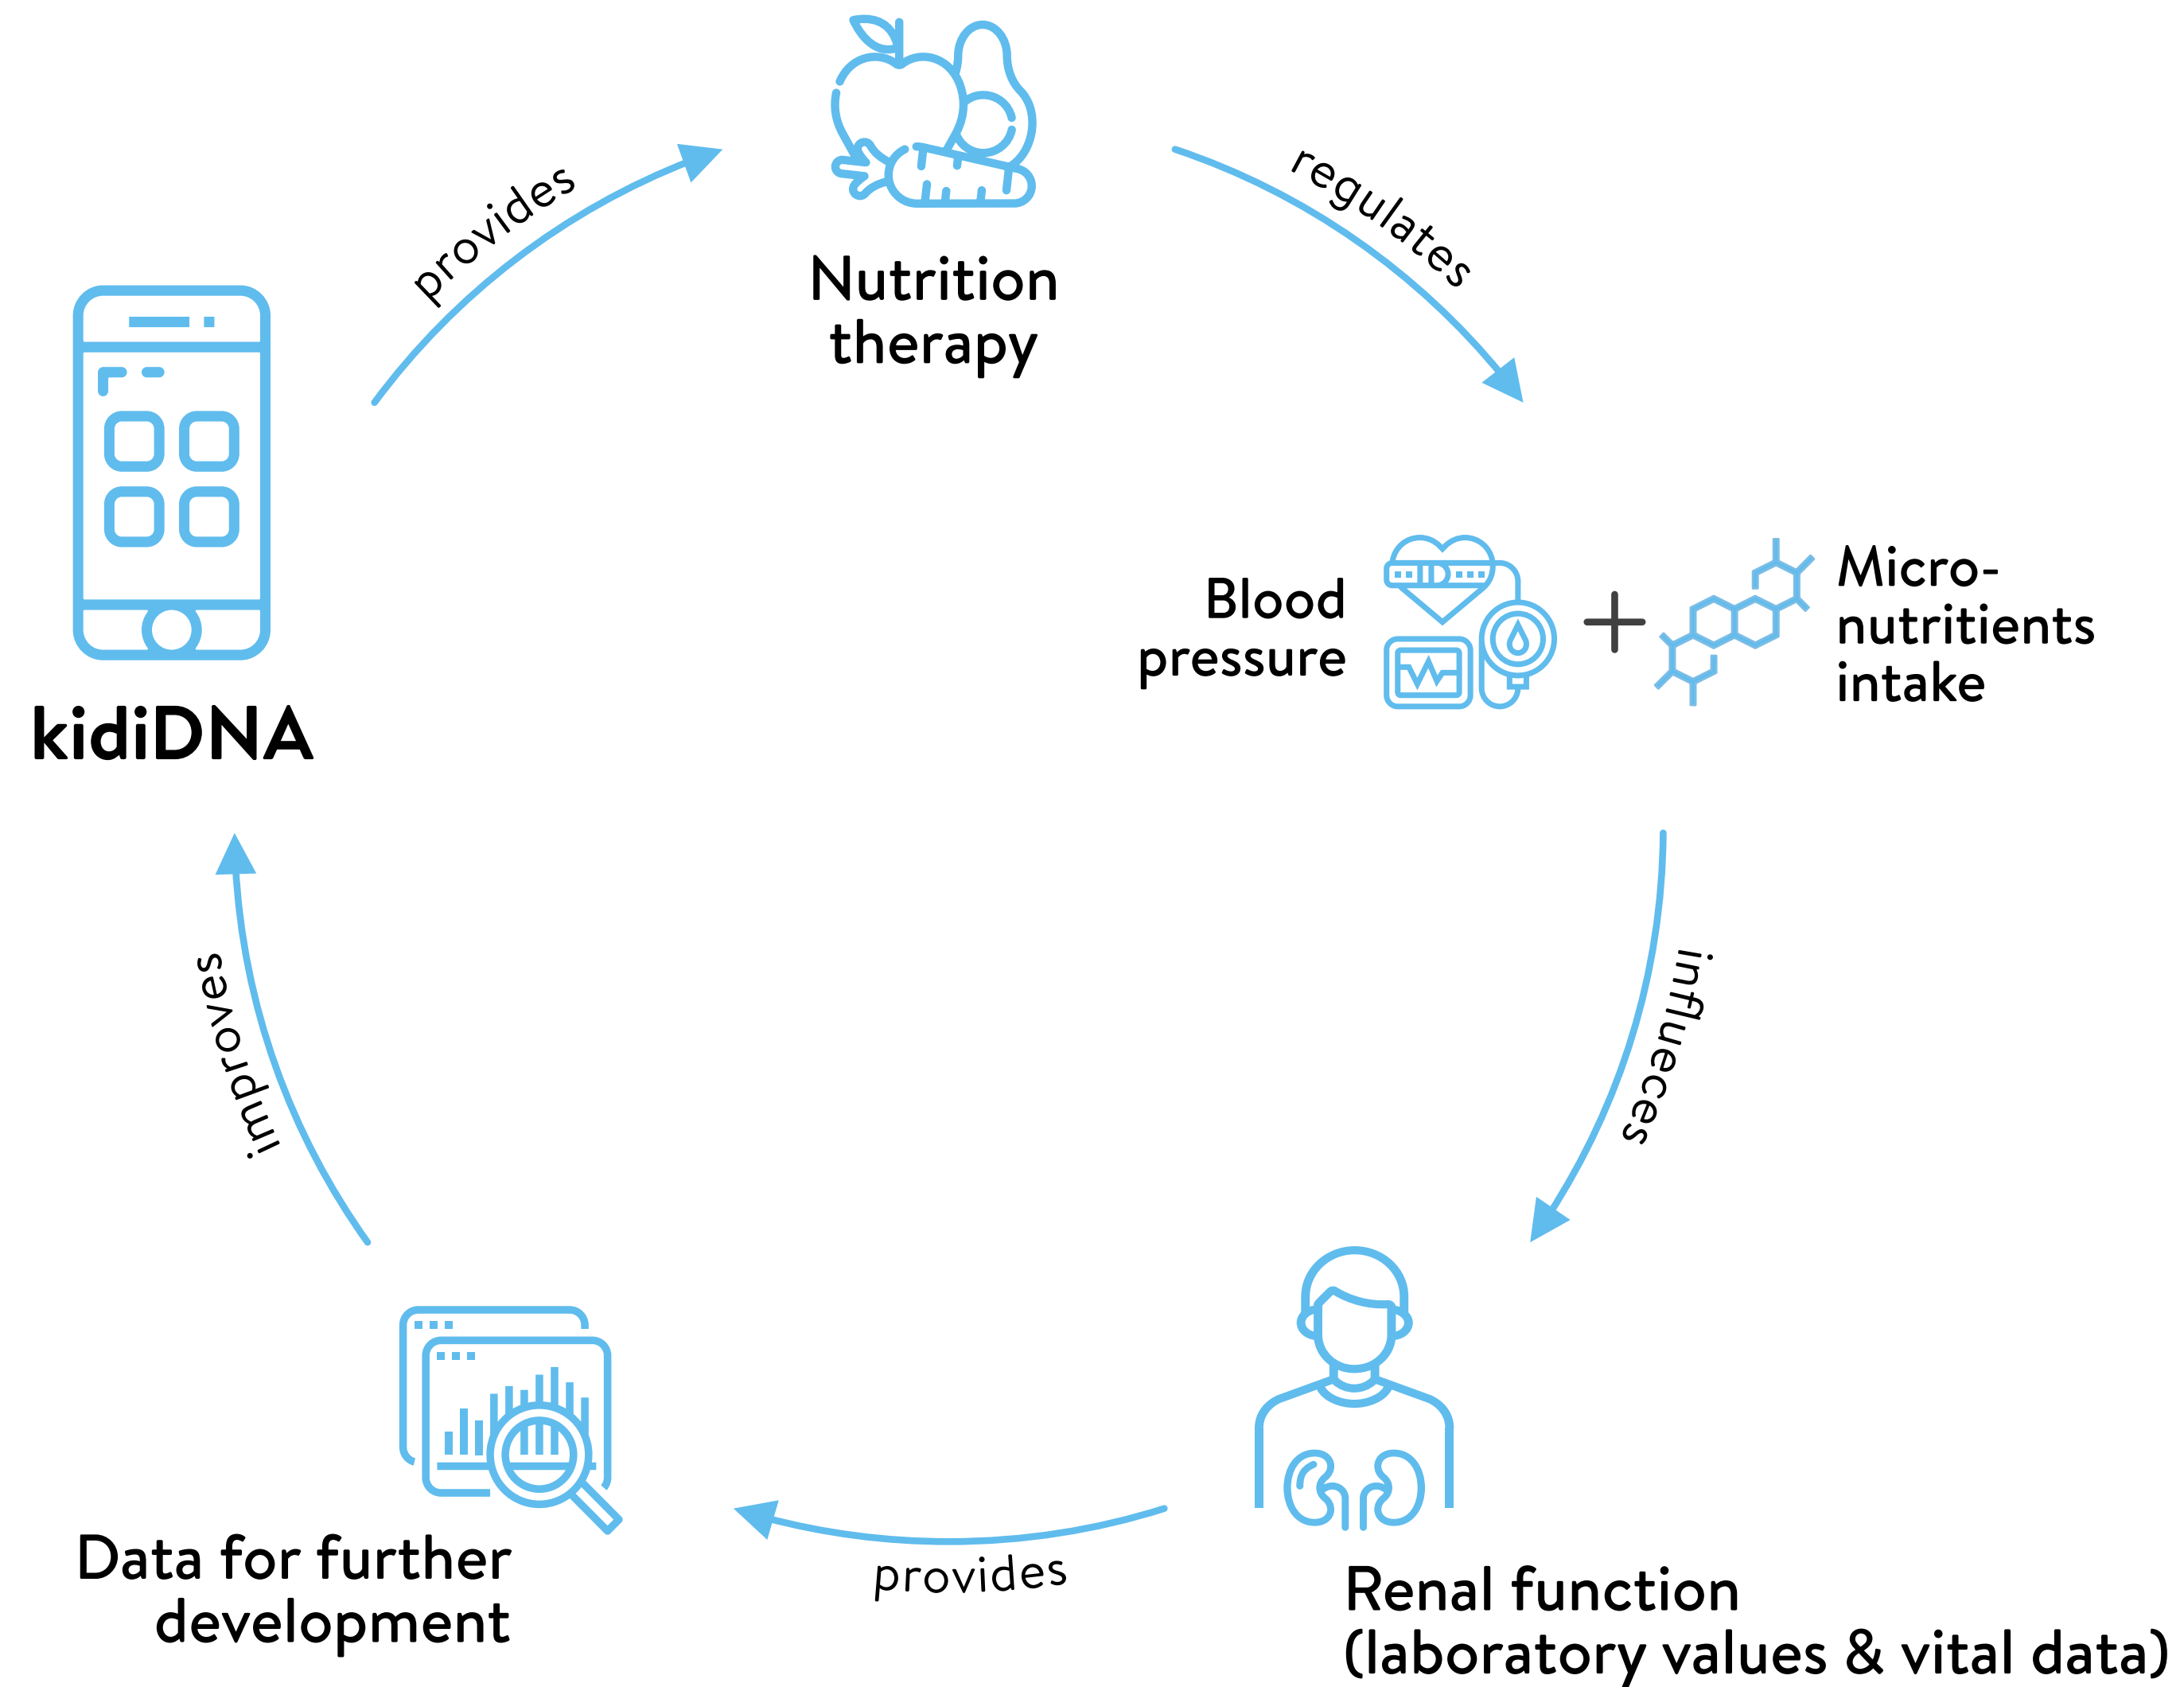

Compliance with (EU) 2016/679 GDPR

- Data protection
- Data security

How kidiDNA works

Our value proposition

Patients

Increase in quality of life
+ slowing of disease progression

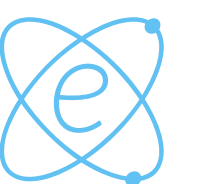

Physicians

Increase of treatment quality and efficiency

Health insurers

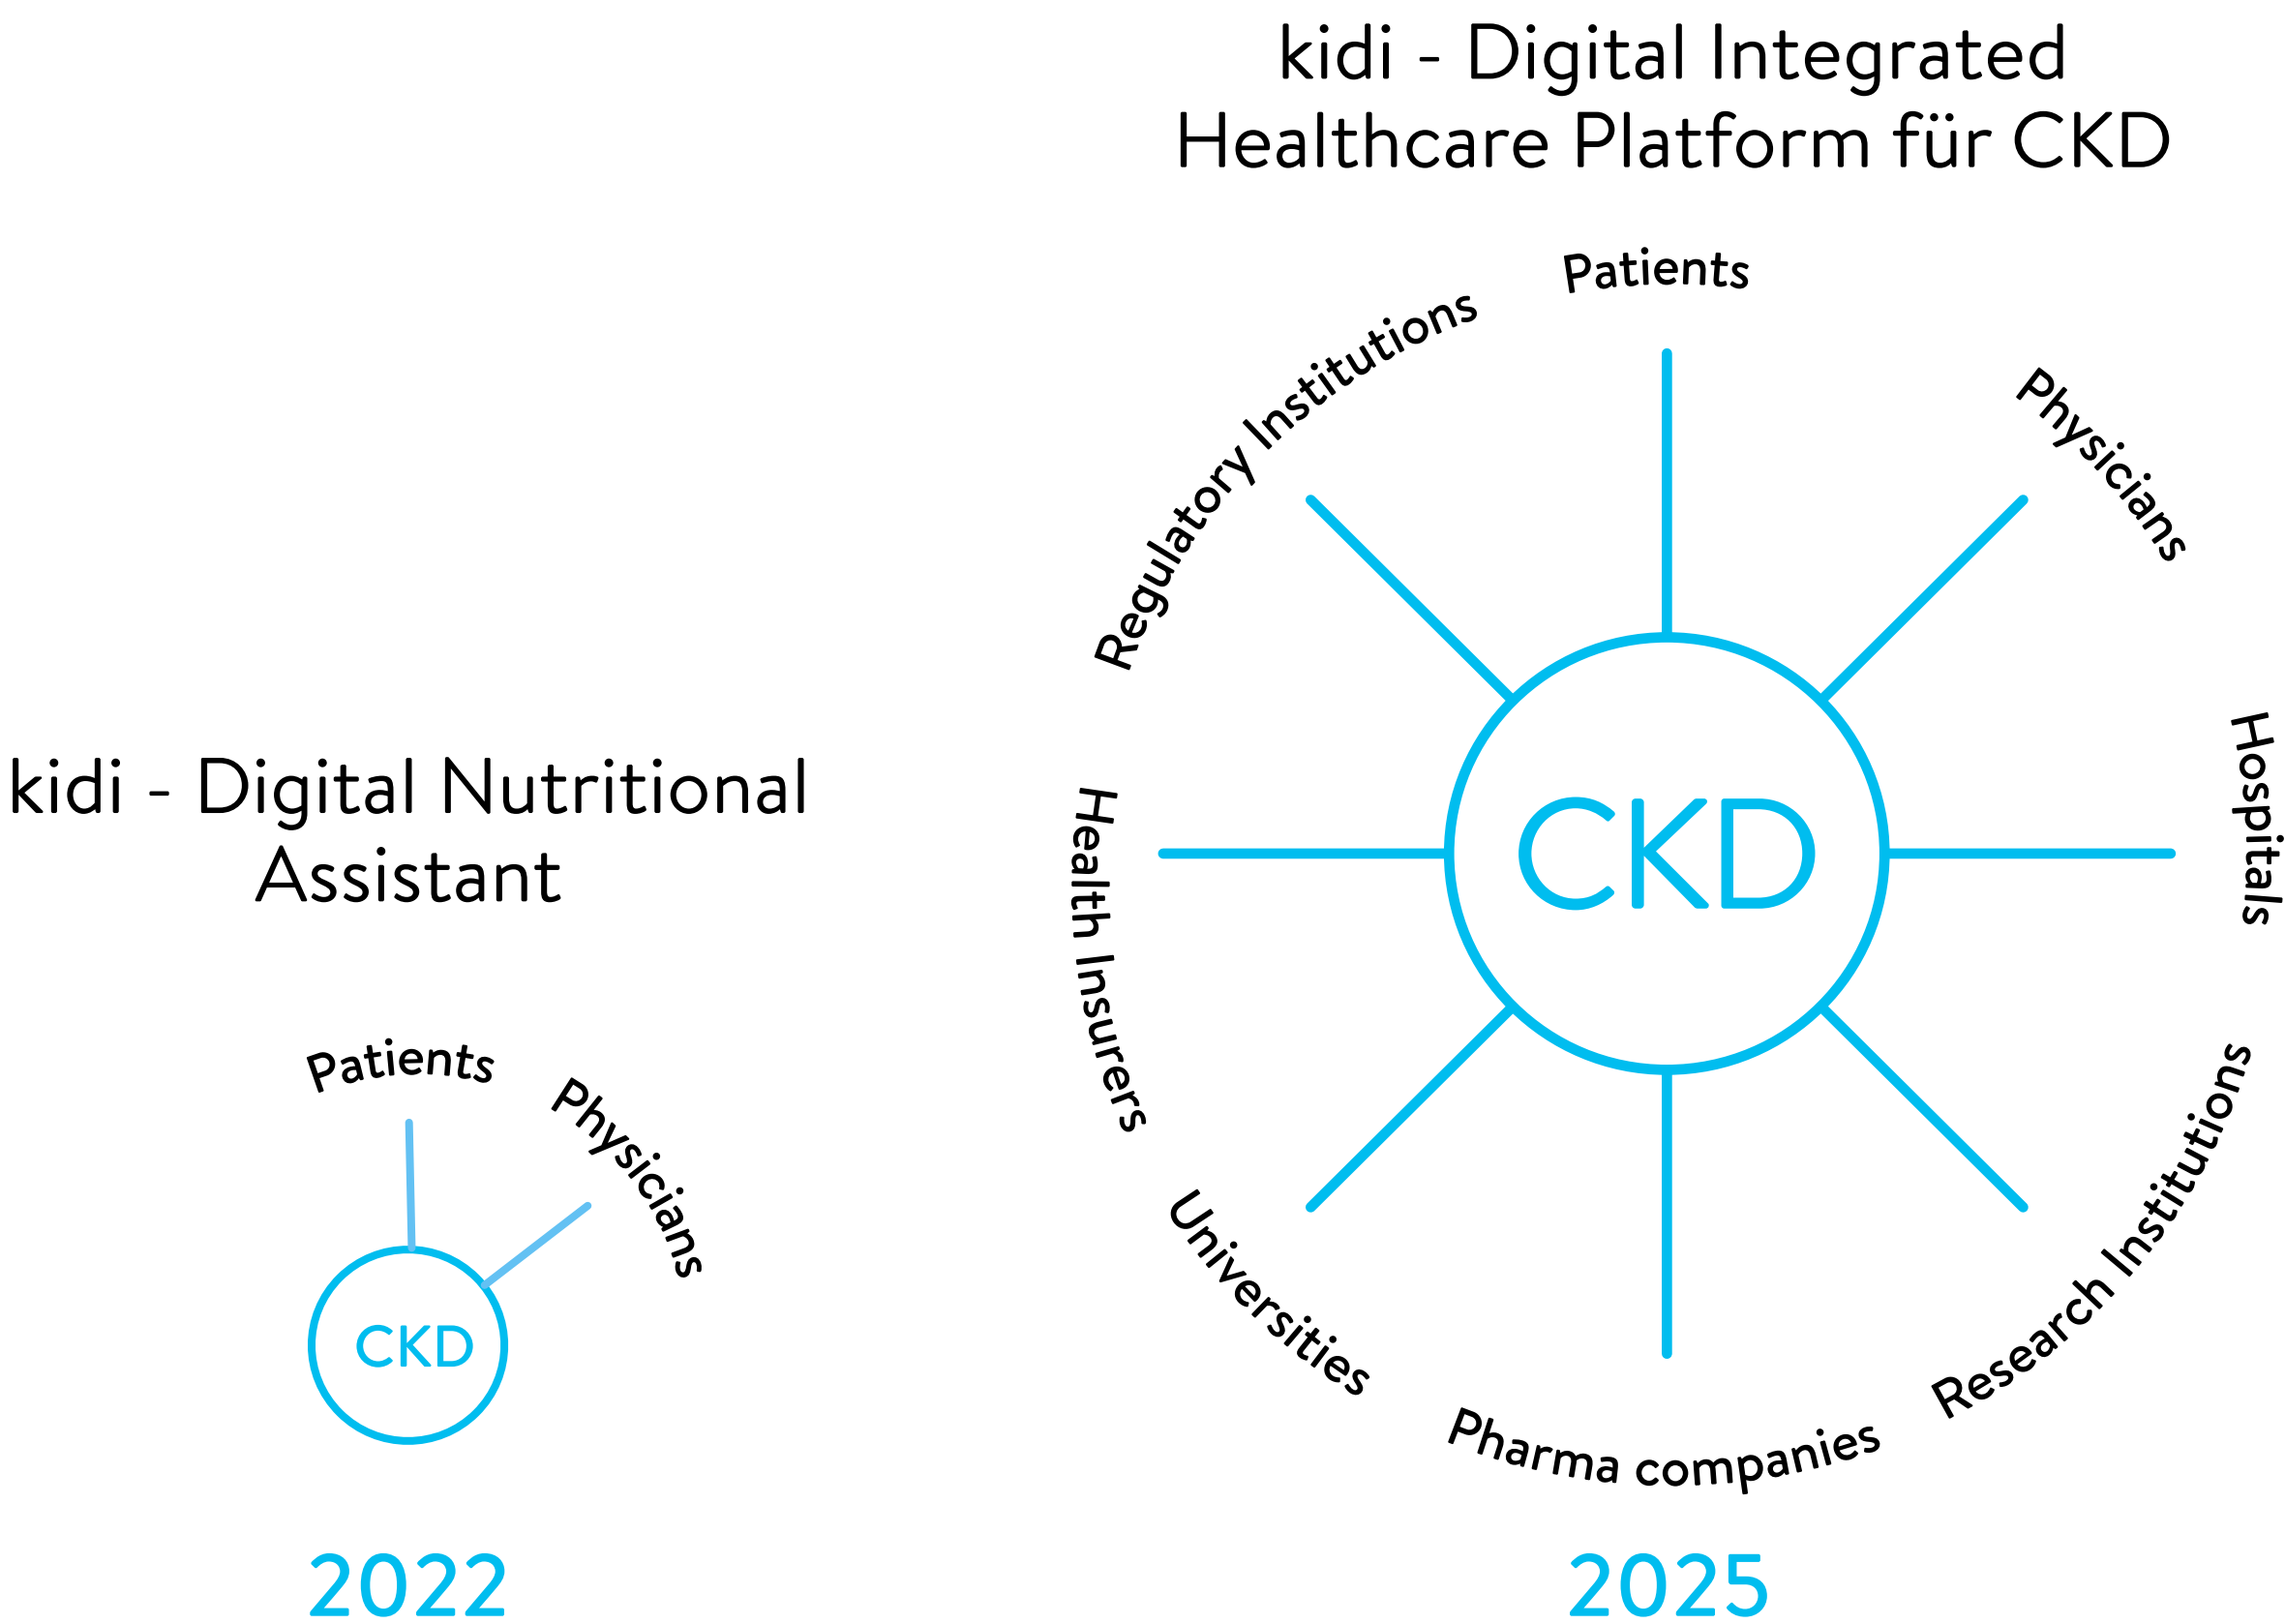

Cost savings due to decrease in
drug consumption,
hospitalizations, dialysis use, etc.

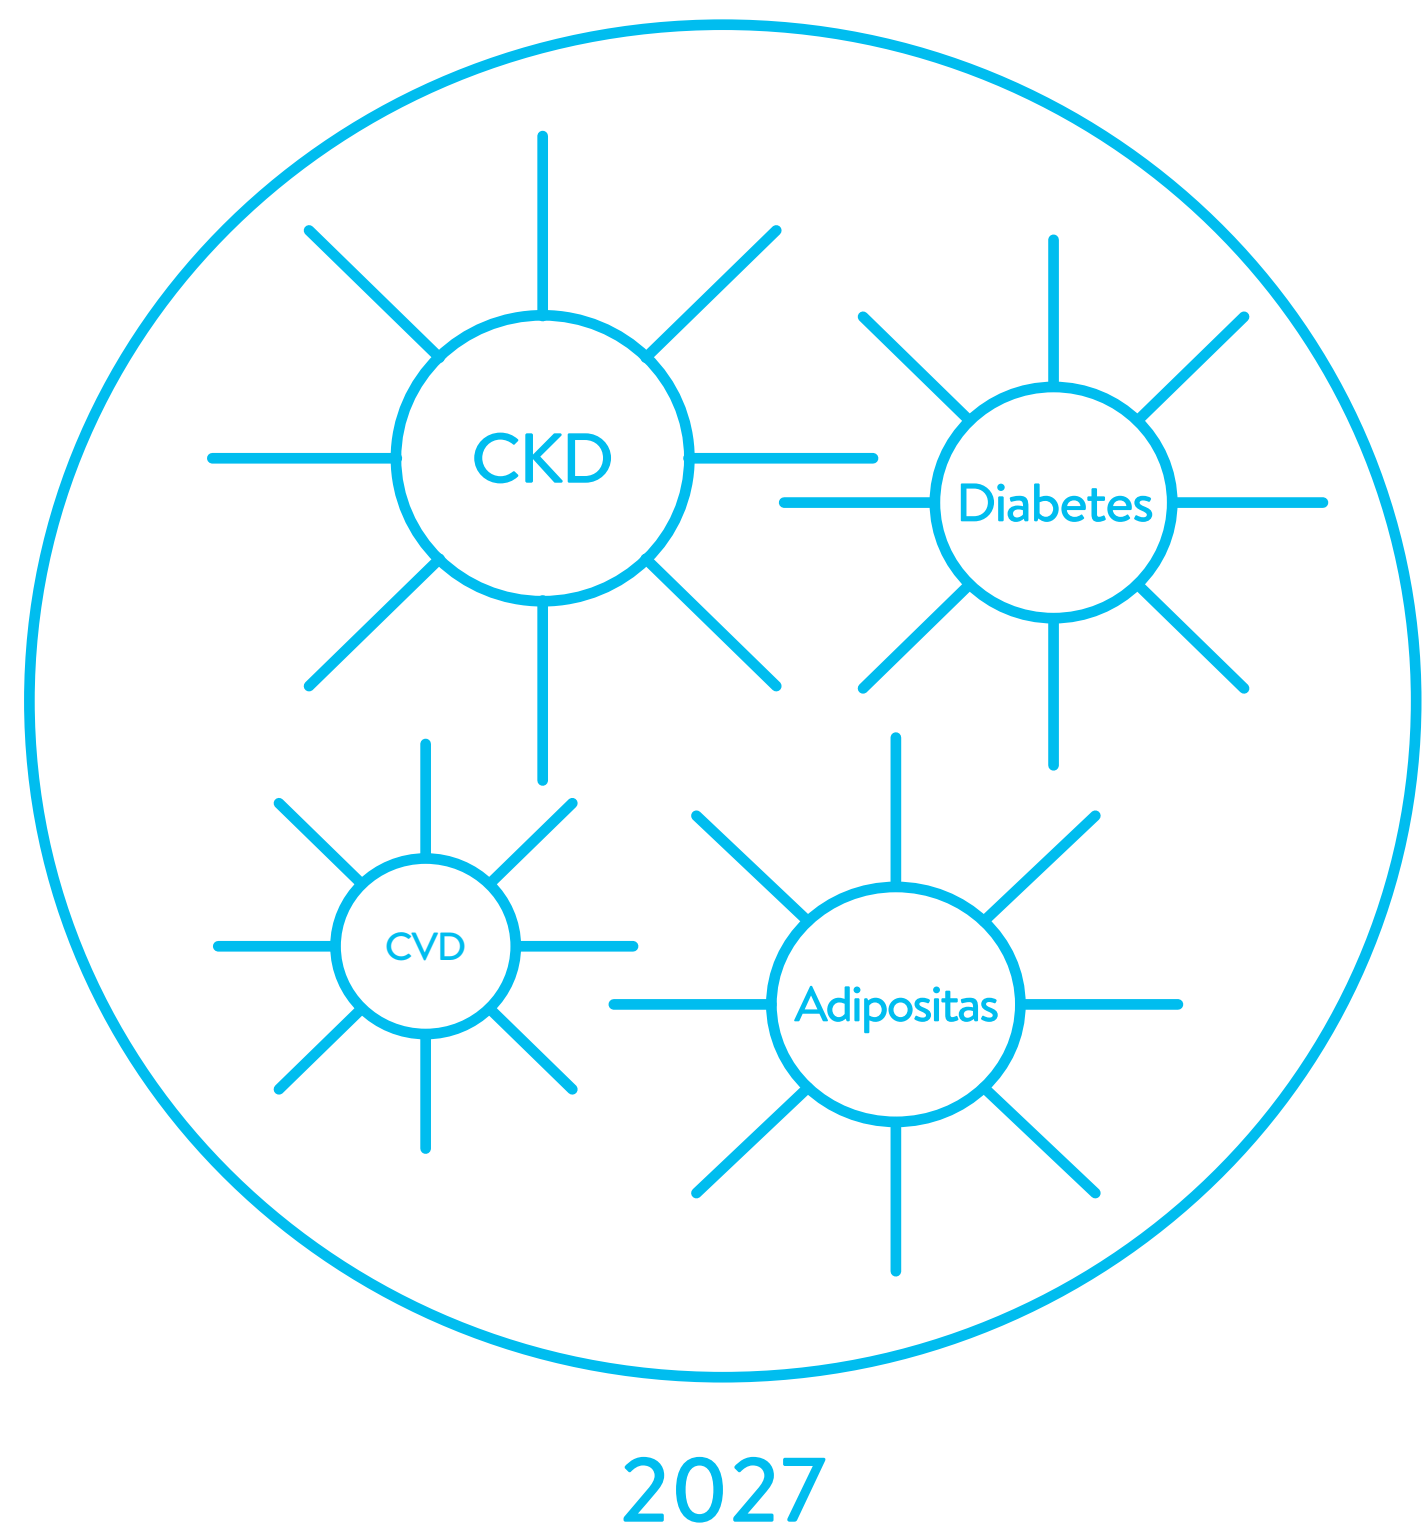

MEDICALS

Scaling the business model

We plan to successively expand our services to other actors in the CDK-ecosystem as well as for other nutrition related diseases.

kidi - Digital Integrated Healthcare Platform for all nutrition related diseases

Contact us

Thank you very much,

and be part of our mission to develop a world wide pioneering digital nutrition assistant and disease manager for chronic disease patients.
